

User Manual: Chatbot Web App

Introduction

Welcome to the chatbot web app. This manual explains how to use the page and interact with the chatbot, including saving, loading, renaming, deleting, and exporting conversations.

Page Overview

The app has three main areas:

1. **Header:** App name and action buttons.
2. **Chat area:** Shows the conversation between you and the bot.
3. **Sidebar / saved chat area:** Displays saved chats and management actions.

Main Chat Area

- User messages appear on the right.
 - Bot messages appear on the left.
 - Each message includes a timestamp.
 - The chat scrolls automatically as new messages appear.
-

Input Area

- Type your message in the input box.
- Press **Enter** or click the **Send** button to submit.
- If the message is empty, it will not send.

Saved Chat Sidebar

- Saved chats are listed with titles and dates.
 - If no chats are saved, the sidebar shows a placeholder message.
-

How to Send a Message

1. Click the input field at the bottom of the page.
2. Type your question or prompt.
3. Press **Enter** or click **Send**.
4. Wait for the bot response in the chat window.

Saving a Chat

1. After chatting, click the **Save Chat** button.
 2. The conversation is stored in your browser.
 3. A confirmation alert appears when save is successful.
-

What Gets Saved

- All user messages
- All bot replies
- The timestamp of each message
- A default chat title based on the current date

Loading a Saved Chat

1. Find the chat in the saved chat sidebar.
 2. Click **Load** next to the conversation.
 3. The chat history will replace the current chat window.
-

Renaming a Saved Chat

1. Find the conversation in the saved sidebar.
2. Click **Rename**.
3. Enter a new name in the prompt box.
4. Click **OK** to save the new title.

Deleting a Saved Chat

1. Find the chat you want to delete.
 2. Click **Delete**.
 3. Confirm the deletion when prompted.
-

Exporting a Chat

1. Open a saved chat or keep the active chat loaded.
2. Click the **Export** button.
3. A downloadable text file will be generated with the full conversation.

Best Practices

- Save chats regularly if you want to keep a record.
 - Rename chats with meaningful titles to find them later.
 - Use the sidebar to organize conversations.
 - Refresh the page only after saving important chats.
-

Troubleshooting

The chat does not send

- Make sure your message is not blank.
- Check that the server is running.
- Refresh the page if the UI appears frozen.

Saved chats do not appear

- Confirm you saved at least one chat.
 - Reload the page to refresh the sidebar.
 - Check browser storage settings if saving still fails.
-

Error: could not reach server

- Make sure the backend server is running.
- Check the browser console for network errors.

Notes

- The app stores saved chats locally in your browser.
- Clearing browser storage will remove saved conversations.
- The chatbot works best with short, clear prompts.
