

Project Design Document

Overview

This chatbot web app is built as a browser-based interface with a Node.js backend. It supports local AI execution through Ollama, browser-based saved chat management, and export capabilities.

Architecture

- **Frontend:** `index.html`, `style.css`, `script.js`
- **Backend:** `server.js` using Express
- **Storage:** Browser `localStorage` for saved chats
- **AI Integration:** Ollama local model accessed via `/chat`

Components
